CSS(style.css) 37

Uvod

- Korišćeni Programski jezici

- Za izradu sajta korišćeni su HTML5 i CSS3 za strukturu i stilizaciju stranica, JavaScript za dinamičke funkcionalnosti i validaciju formi, kao i jQuery biblioteka za lakše upravljanje DOM elementima i AJAX pozive. Za ikonice je korišćen Font Awesome, dok je razvoj realizovan u Visual Studio Code okruženju i testiran u modernim web pregledačima.

- Funkcionalnosti

1. Dinamička navigacija(Responsive Menu)

```
// Navigacija
function initNavigation() {
    const navToggle = document.querySelector('.nav-toggle');
    const navMenu = document.querySelector('.nav-menu');

    if (navToggle && navMenu) {
        navToggle.addEventListener('click', function() {
            navMenu.classList.toggle('active');
        });

        const navLinks = document.querySelectorAll('.nav-link');
        navLinks.forEach(link => {
            link.addEventListener('click', function() {
                navMenu.classList.remove('active');
            });
        });

        document.addEventListener('click', function(e) {
            if (!navToggle.contains(e.target) && !navMenu.contains(e.target)) {
                navMenu.classList.remove('active');
            }
        });
    }
}
```

Implementiran je interaktivni navigacioni meni koji se prilagođava mobilnim uređajima. Funkcionalnost uključuje "hamburger" taster koji otvara meni, automatsko zatvaranje menija

nakon odabira linka, kao i pametno zatvaranje menija klikom bilo gde van navigacione zone (Event Delegation).

2. Asinhrono učitavanje podataka (AJAX & JSON)

```
function loadFeaturedProducts(container) {

    container.innerHTML = `
        <div class="loading" style="grid-column: 1 / -1;">
            <div class="spinner"></div>
            <p>Učitavanje proizvoda...</p>
        </div>
    `;

    // Ajax
    const xhr = new XMLHttpRequest();
    xhr.open('GET', 'data/products.json', true);

    xhr.onreadystatechange = function() {
        if (xhr.readyState === 4) {
            if (xhr.status === 200) {
                try {
                    const data = JSON.parse(xhr.responseText);
                    const featuredProducts = data.products.filter(product =>
product.featured);
                    displayProducts(featuredProducts, container);
                } catch (error) {
                    container.innerHTML = '<p style="grid-column: 1 / -1; text-
align: center;">Greška pri učitavanju podataka.</p>';
                    console.error('JSON parsing error:', error);
                }
            } else {
                container.innerHTML = '<p style="grid-column: 1 / -1; text-align:
center;">Greška pri učitavanju proizvoda.</p>';
            }
        }
    };

    xhr.onerror = function() {
        container.innerHTML = '<p style="grid-column: 1 / -1; text-align:
center;">Greška pri povezivanju sa serverom.</p>';
    };

    xhr.send();
}
```

Centralni sistem za prikaz proizvoda koristi XMLHttpRequest za asinhrono dobavljanje podataka iz eksternog products.json fajla. Ovim je postignuto razdvajanje podataka od prezentacionog sloja, što omogućava lakše ažuriranje kataloga odela bez izmene HTML koda.

3. Dinamičko generisanje sadržaja (DOM Manipulation)

```
function createProductCard(product) {
    const badgeHtml = product.badge ? `<span class="product-
badge">${product.badge}</span>` : '';
    const priceHtml = product.oldPrice
        ? `<span class="old-price">${formatPrice(product.oldPrice)}</span>
${formatPrice(product.price)}`
        : formatPrice(product.price);

    return `
        <article class="product-card">
            <div class="product-image">
                <img src="${product.image}" alt="${product.name}">
                ${badgeHtml}
            </div>
            <div class="product-info">
                <h3 class="product-name">${product.name}</h3>
                <p class="product-price">${priceHtml}</p>
            </div>
        </article>
    `;
}
```

Funkcija za prikaz proizvoda dinamički kreira HTML strukturu (kartice proizvoda) na osnovu podataka iz JSON-a. Implementirano je i automatsko formatiranje valute (RSD) prema lokalnim standardima korišćenjem toLocaleString metode.Prikaz proizvoda

4. Filtriranje, pretraga i sortiranje

```
function applyFilters() {
        let result = [...allProducts];

        // Filter kategorije
        const category = categoryFilter ? categoryFilter.value : 'sve';
        if (category !== 'sve') {
            result = result.filter(p => p.category === category);
        }
```

```
        // Filter pretrage
        const searchTerm = searchInput ? searchInput.value.toLowerCase().trim() :
'';
        if (searchTerm) {
            result = result.filter(p =>
                p.name.toLowerCase().includes(searchTerm) ||
                p.description.toLowerCase().includes(searchTerm)
            );
        }

        // Sortiranje
        const sortValue = sortFilter ? sortFilter.value : 'default';
        switch (sortValue) {
            case 'price-asc':
                result.sort((a, b) => a.price - b.price);
                break;
            case 'price-desc':
                result.sort((a, b) => b.price - a.price);
                break;
            case 'name-asc':
                result.sort((a, b) => a.name.localeCompare(b.name));
                break;
            case 'name-desc':
                result.sort((a, b) => b.name.localeCompare(a.name));
                break;
        }

        filteredProducts = result;
        displayProducts(filteredProducts, productsContainer);
    }
```

Na stranici prodavnice omogućena je napredna obrada podataka na strani klijenta. Korisnik može filtrirati odela po kategorijama, pretraživati bazu po ključnim rečima (ime ili opis) i sortirati asortiman po ceni ili abecednom redu.Dodavanje u korpu(toast notifikacija)

5. Validacija formi (Regex i Logika)

```
function validateForm(data) {
    const messageContainer = document.getElementById('form-message');

    if (!data.name || data.name.length < 2) {
        showFormMessage('error', 'Molimo unesite vaše ime (minimum 2
karaktera).');
        return false;
```

```
    }

    if (!isValidEmail(data.email)) {
        showFormMessage('error', 'Molimo unesite validnu email adresu.');
        return false;
    }

    if (!data.message || data.message.length < 10) {
        showFormMessage('error', 'Molimo unesite vašu poruku (minimum 10
karaktera).');
        return false;
    }

    return true;
}
```

Implementirana je provera ispravnosti podataka pre slanja kontakt forme i newsletter prijave. Koristi se Regular Expression (Regex) za proveru formata email adrese, dok se za ostala polja proverava minimalna dužina karaktera kako bi se osigurao kvalitet unosa.

6. Korisnički efekti(Smooth Scroll & Header efekat)

```
// Smooth scroll za ankor linkove
document.querySelectorAll('a[href^="#"]').forEach(anchor => {
    anchor.addEventListener('click', function(e) {
        e.preventDefault();
        const target = document.querySelector(this.getAttribute('href'));
        if (target) {
            target.scrollIntoView({
                behavior: 'smooth'
            });
        }
    });
});

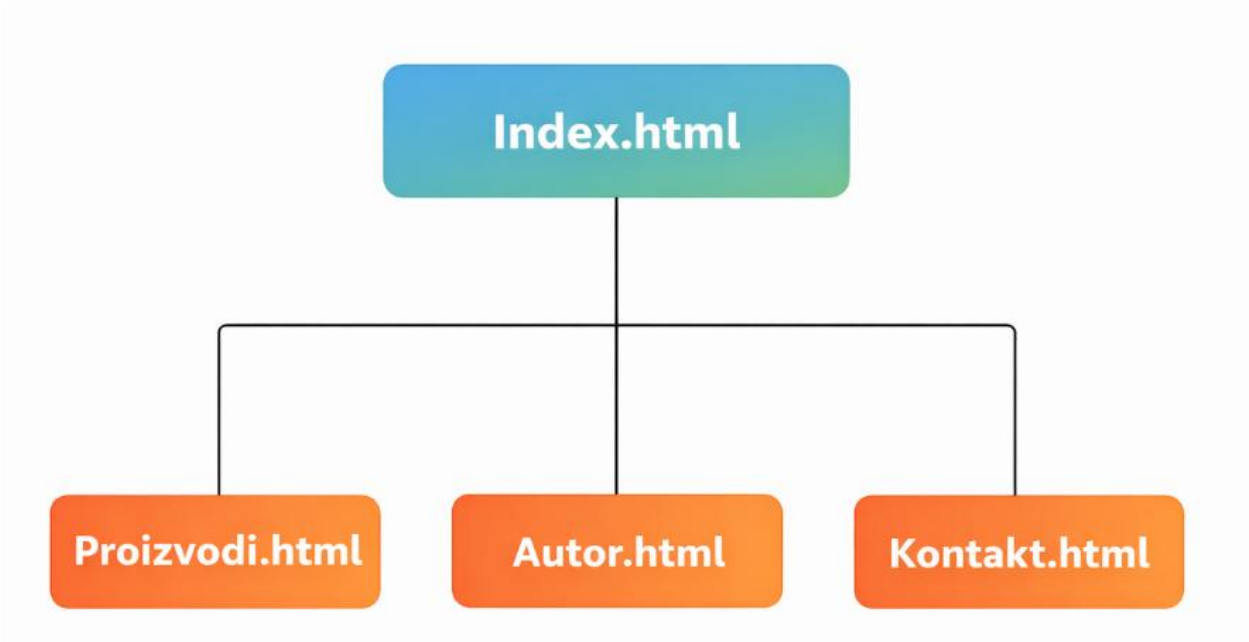
// Skrol efekat za header
window.addEventListener('scroll', function() {
    const header = document.querySelector('.header');
    if (header) {
        if (window.scrollY > 100) {
            header.style.boxShadow = '0 4px 20px rgba(0, 0, 0, 0.1)';
        } else {
            header.style.boxShadow = '0 2px 10px rgba(0, 0, 0, 0.05)';
        }
```

```
    }
});
```

Za poboljšanje vizuelnog identiteta sajta, implementiran je Smooth Scroll za unutrašnje linkove koji omogućava glatko kretanje kroz stranicu, kao i dinamička promena stila zaglavlja (Header) prilikom skrolovanja radi bolje preglednosti.

2. Organizacija

- Organizaciona šema



- Mapa sajta

```xml

                    <p>Ovaj projekat je izrađen u okviru predmeta Web
Programiranje 2. Sajt predstavlja online prodavnicu elegantnih muških odela, sa
fokusom na moderan dizajn i dinamičko generisanje sadržaja korišćenjem AJAX
tehnologije i JSON formata podataka.</p>

                    <p>Tokom izrade projekta, fokus je bio na primeni savremenih
web standarda, responzivnog dizajna i interaktivnosti korišćenjem vanilla
JavaScript-a bez eksternih biblioteka.</p>
